25X1C

[REDACTED] a list of the Magistrate of Gross Berlin,
Economy Department, Industry Section regarding the western DM funds
probably required by the firms of the Soviet Sector in Berlin for
imports during the four quarters of 1950. A compilation of the main
items listed would come to the following amounts:

Bar, round and flat steel	141 tons	75,000 DM
Rolled materials, especially boiler, dynamo plates, and light sheets	517 tons	195,000 DM
Small iron parts, tools and steelware	60 tons	187,000 DM
Machines		282,000 DM
Fine mechanical and optical instruments		134,000 DM
Ball bearings		16,000 DM
Chemicals		118,000 DM
Total including various smaller items, about		1,245 million DM *

25X1A

* [REDACTED] Comment. This sum corresponds to 1 percent of the entire goods
delivered each month by western Germany to West Berlin or to 10 percent
of the West German deliveries of steel, rolled materials, machines, tools,
fine mechanical and optical instruments. Thus the sums listed by East
Berlin represent comparatively insignificant quantities and funds.
See annex for photostat.
